Dear Colleagues,

I am writing today in support of Kieah Hamric's application for the CCA Mentored Research Awards for her piece, entitled *Snack Lounge*. This piece was commissioned as a part of the College Of Creative Arts Commissioned Student Artworks Program. The selection committee and I specified that priority would be given to works that exhibited conceptual, thematic, or formal consideration of the space and engaged meaningfully with the use and/or architectural features of that location. We were especially interested in Hamric's careful consideration of the social function of the space as well as her use of a conceptually relevant design sensibility. The development of the piece showed careful attention to formally and conceptually relevant concerns. Hamric took constructive feedback and executed the work with a high degree of professionalism. She met deadlines for submission and delivered a delightful project that will hopefully have a long life in the visual landscape of the CCAC.

Thank you for your time

Jason Zeh
